SUMMARY

INTRODUCTIONS

Marco Fioravanti	
A NEW VISION OF CULTURAL HERITAGE	9
Keynote	
Carsten Paludan-Müller <i>Cultural heritage - and the politics of conflict, poverty, peace and prosperity"</i>	10
Marc Caball <i>Individuals, societies, cultures and health</i>	11
Piero Baglioni <i>Science for the conservation of the cultural heritage</i>	12
Mario Santana-Quintero <i>Centering the role of documentation in conserving our built heritage</i>	13
Philip Cooke <i>Innovation, creativity, green economy</i>	14

Session 1 THE HUMAN DIMENSION IN CULTURAL HERITAGE

1.1 Cultural identity, landscapes and intangible heritage	
Agostino Paravicini Bagliani <i>Medioevo europeo. Medieval studies and technological resources</i>	19
Jozsef Laszlovszky <i>Monastic landscapes and the related historical and archaeological aspects</i>	21
Graham Fairclough <i>21st century lifestyles: landscape, heritage and urban identity</i>	23
Pavlina Misikova <i>Potential of co-operation of the pan-european platform on cultural heritage and landscape</i>	25
Jean-Paul Métaillé <i>"Facing the landscape": how cultural heritage is took in account in natural parks of the french pyrenees</i>	25
Bas Pedrolí <i>Landscape - mirror of our culture. An interdisciplinary challenge safeguarding landscape values</i>	26
Amedeo Amedei, Rosa Valanzano, Mario Milco D'elios, Gianfranco Gensini, Donatella Lippi	26
<i>Florence and medical humanities: intangible heritage of mankind</i>	26
Lages <i>Public space as cultural heritage</i>	27
Paolo Del Bianco <i>Discovering the past together, building a common future. The no-profit life beyond tourism® portal, to discover and promote local cultural biography</i>	27
Margherita Azzari, Camillo Berti, Paola Zamperlin <i>Wettus - wetlands atlas of tuscany</i>	28
Magdalena Bielenia-Grajewska <i>The role of cultural heritage in shaping symbolic corporate linguistic identity</i>	28
Tommasso Martino <i>The history of emotions and the safeguard of cultural heritage</i>	29
Carolina Capitanio <i>The historic urban landscape of Florence. Critical survey and redevelopment of the urban landscape</i>	30
Carsten Paludan-Müller <i>History and identity: "cultural heritage - and the politics of conflict, poverty, peace and prosperity"</i>	31
Fabio Lucchesi, Martina Angeletti, Francesco Monacci, Giovanni Ruffini, Nunziella Toscano	31
<i>Persistence and metamorphosis in the settlements in Tuscany</i>	32
Luigi Zangheri <i>Remarks on landscape</i>	32
1.2 Arts, architecture & archaeology on material heritage	
Alasdair Ross <i>Tourism and recreation versus protecting cultural landscapes and heritage in the scottish highlands</i>	33
Claire McIlroy <i>The history of emotions: preserving europe's cultural heritage through interdisciplinary research collaboration</i>	35
Gert Melville <i>Medieval monasteries and religious orders as laboratories of innovation for modern times</i>	37
Camilla Mileto, Fernando Vegas <i>The role of restoration of heritage in the future europe: recovering the cultural landscape as an identity sign</i>	39
Ray Bondin <i>Heritage is a financial asset</i>	41
Paul Mironneau <i>History at museum, museum faced with history: a debate upon emotions</i>	42
Guido Vannini, Michele Nucciotti <i>Light and public!</i>	44
1.3 Written heritage, libraries, archives and other collection of social documents	
Cristina Blanco Sío-López <i>Preservation and valorisation strategies through digital humanities: the case of the CVCE's enhancement of research and education in european integration studies</i>	46
Simon Tanner <i>Preserving the past, imaging the future: how democratising access and generating measurable changes to people's lives is affecting preservation strategies for cultural heritage</i>	48
Worthy N. Martin <i>Thematic repositories of cultural heritage - case studies to inform future research and development</i>	50
Toby Burrows <i>Organizing digital resources for cultural heritage research</i>	52
Wendy Scafe <i>Medieval manuscript heritage: digital research challenges and opportunities</i>	54

Cristina Dondi <i>The integration of provenance data for the reconstruction of the dispersed european book heritage</i>	57
Margherita Azzari, Irene Caloud, Paola Zamperlin <i>ARCES project - digital archive of italian scientific expeditions and colonial cartography</i>	59
CLIEO <i>centro di linguistica storica e teorica: italiano, lingue europee, lingue orientali</i>	59
Angela Frati <i>Accademia della Crusca</i>	60
Nicoletta Maraschio <i>Accademia della Crusca</i>	61
Patricia Engel <i>Common strategic framework for future eu research and innovation funding consultation</i>	63
W.N. Martin <i>Safeguard of cultural heritage: a challenge from the past for the Europe of tomorrow</i>	67
Massimo Moneglia <i>Spoken language archives at the lablita lab of the university of Florence. Projects and resources</i>	69
Gabriele Rossi Rognoni, Donatella Mitolo <i>Recovery and conservation of musical heritage: the music of grand prince Ferdinando de' Medici</i>	70
Session 2 SCIENCE FOR CONSERVATION OF CULTURAL HERITAGE	71
2.1 CONSERVATION METHODS AND MATERIALS SCIENCE	
Lars Ivar Elding <i>Conservation of the Vasa warship</i>	73
Matija Strlic <i>Historic paper - Degradation and non-destructive testing</i>	75
Luca Uzielli <i>The material sciences applied to wood restoration: future perspectives</i>	77
Philippe Colomban Ladir <i>The on-site Raman analysis of cultural heritage artefacts, paintings, rock art, pottery, glasses,... drawbacks and success!</i>	79
Linda Cocchi, Paola Mazzanti, Luca Uzielli <i>The trittico di San Pietro Martire by Beato Angelico: a panel painting deformation behaviour</i>	81
Michela Grimaldi <i>Selection and characterization of biosurfactants for the bio-cleaning application to surface deposits on stone artwork</i>	82
Irene Natali, Martina Naldini, Emiliano Carretti, Piero Baglioni, Luigi Dei <i>Nanocomposite systems composed by teos and ca(oh)2 nanoparticles for the conservation of architechtonic surfaces</i>	82
Irene Natali, Federica Marinelli, Emiliano Carretti, Piero Baglioni, Luigi Dei, Lora Angelova, Richard G. Weiss <i>Low impact polymeric aqueous systems for the cleaning of painted surfaces</i>	83
Mariangela Potenza, Giuseppina Sabatino, Francesca Giambi, Luca Rosi, Luigi Dei and Anna Maria Papini <i>Diagnostics of egg-based paintings in cultural heritage: an innovative combined dot-elisa and uplc-based amino acid analysis approach</i>	83
Federica Acciai, Francesca Donnarumma, Antonio Frandi, Lucia Liccioli, Massimiliano Marvasi, Giorgio Mastromei, Irene Padovani, and Brunella Perito <i>Characterization of yeast-like strains isolated from deteriorated areas of two marble statues</i>	84
2.2 ARCHAEOOMETRY: METHODS AND GEOMATERIALS	
Vincent Serneels <i>The archaeology of iron production</i>	85
David Bougarit <i>On the utility of experimental simulation towards the understanding of ancient technological processes: the example of brass cementation</i>	87
Aurelio Climent-Font <i>Lustre ceramics. A sophisticated decoration method unravelled with the contribution of IBA techniques</i>	89
Vivi Tornari <i>The outcome of two EC projects (FP5 LASERACT and FP6 MULTIENCODE) in new instrumentation design of laser coherent metrology implementation for on-field implemetation. New applications and perspectives for cultural heritage research, education and training</i>	91
J. La Nasa, S. Orsini, F. Di Girolamo, F. Modugno, I. Bonaduce, M.P. Colombini <i>Characterisation of synthetic varnishes and paint materials by analytical methods based on pyrolysis and mass spectrometry</i>	92
C. Lofrumento, D. De Feo, E.M. Castellucci, M. Ricci, L. Bachechi, E.M. Castellucci <i>Spectroscopic analyses on rock art paintings from east central Ethiopia</i>	93

LERMAB, UMR1093, INRA, ENGREF, Nancy, France

The "Mona Lisa" (Louvre Museum, Paris) has been painted during the period 1503-1514 by Leonardo da Vinci on a panel of Poplar (*Populus alba* L.) ~79 x 53 cm, ~13 mm thick.

The panel, which features a complex double curvature, is affected by a ~11 cm-long crack, possibly dating not long after the painting was made, running through the whole thickness, tightly connected with the pattern of permanent curvature. The panel is inserted in an Oak frame ("châssis-cadre"), and is slightly forced against it by means of four cross-beams, which hold it flatter than it would be if unconstrained.

Since the "Mona Lisa" was going to be moved in a new display case in the "Salle des États", in 2004 the Curators of the Louvre Museum asked us the main following questions:

- evaluate climatic specifications for the new display case
- assess the risk of crack propagation
- suggest possible modifications to the frame ("châssis-cadre")
- improve the monitoring procedure (the display case gets opened yearly, to check the conditions of the painting).

Our group studied the panel's geometry, the anatomical and physical properties of the panel's wood, and evaluated the constraint conditions produced by the frame. We also designed and implemented, among others, techniques and equipment:

for manual measurements, to be performed on the panel, on the occasion of the yearly opening (weight, shape, forces exerted by the cross-beams).

for automatic monitoring deformations and forces exerted by the cross-beams, during the normal stay of the panel in the display case, where the climate is tightly controlled, but however some slight variations of T and RH inevitably occur and produce some very small distortions.

In 2006 a Book was published, summarizing the results of the several researches carried out on the "Mona Lisa" in that period.

Among several other results, the following were obtained and described in such book.

The observed trend for deflection of the Panel could be well predicted by a heat & mass transfer + hygromechanical computer model.

The risk of crack propagation has also been assessed, on the basis of the computer model and by means of Griffith theory.

This study keeps ongoing, every year we are present at the opening of the display case.

Data obtained so far provides valuable information on this Panel's behaviour; data analysis and mechanical modeling provide promising results also for Panel Paintings in general – work is still in progress.
