

**Supplementary Table 1. Correlations between absolute perihematomal oedema (aPHO) volume and cerebral blood volume (CBV) within and around the haematoma at different time-points.**

|            | aPHO T0 |       | aPHO T1 |        | aPHO T7 |       |
|------------|---------|-------|---------|--------|---------|-------|
|            | Rho     | P     | Rho     | P      | Rho     | P     |
| HC CBV     | -0.180  | 0.027 | -0.078  | 0.343  | -0.275  | 0.001 |
| PR CBV     | -0.254  | 0.002 | -0.301  | <0.001 | -0.279  | 0.001 |
| NA CBV     | 0.057   | 0.489 | 0.012   | 0.886  | 0.046   | 0.575 |
| ΔCBV NA-PR | 0.094   | 0.252 | 0.039   | 0.632  | 0.247   | 0.002 |
| ΔCBV PR-HC | -0.162  | 0.047 | -0.225  | 0.006  | -0.245  | 0.003 |

Rho, Spearman Rank Correlation; T0, admission; T1, 24 hours after bleeding; T7, 7 days after bleeding; HC, haemorrhagic core; PR, perihematomal rim; NA, normal appearing brain tissue; CO, contralateral hemisphere; ΔCBV NA-PR, absolute changes in CBV from NA to PR; ΔCBV PR-HC, absolute changes in CBV from PR to HC.

**Supplementary Table 2. Correlations between absolute perihematomal oedema (aPHO) volume and mean transit time (MTT) within and around the haematoma at different time-points.**

|             | aPHO T0       |        | aPHO T1 |        | aPHO T7 |        |
|-------------|---------------|--------|---------|--------|---------|--------|
|             | Rho           | P      | Rho     | P      | Rho     | P      |
| HC MTT      | MTT HC        | 0.135  | 0.100   | 0.091  | 0.269   | 0.038  |
| PR MTT      | MTT PR        | 0.247  | 0.002   | 0.307  | <0.001  | 0.314  |
| NA MTT      | MTT NP        | 0.105  | 0.202   | 0.137  | 0.094   | 0.234  |
| ΔMTT NA-PR  | Δ MTT NP - PR | -0.180 | 0.027   | -0.181 | 0.027   | -0.103 |
| ΔCMTT PR-HC | Δ MTT PR - HC | 0.080  | 0.328   | 0.153  | 0.061   | 0.124  |

Rho, Spearman Rank Correlation; T0, admission; T1, 24 hours after bleeding; T7, 7 days after bleeding; HC, haemorrhagic core; PR, perihematomal rim; NA, normal appearing brain tissue; CO, contralateral hemisphere; ΔCBV NA-PR, absolute changes in CBV from NA to PR; ΔCBV PR-HC, absolute changes in CBV from PR to HC.
