In February 2018, the Department of Architecture of the University of Florence (DIDA) promoted an open and public analysis and evaluation of the research carried out by the Department during its first five years of existence in order to define its strategy, the relationship with third and second cycle education, the role of experimental research and the DIDA-LABS laboratory system, as well as of research units and inter-university research centers.

The objective of the DIDA Research Week, through the documentation, communication and evaluation of the activites carried out by the Department in national and international research projects or in individual or exploratory projects, is an analysis and an in-depth reflection on the research activites at all levels carried out during the first five years of the Department: a wide and transparent reflection which communicates what the research carried out by DIDA is in all its different forms, calling the most qualified colleagues in Florence, Italy and abroad to discuss and to evaluate it and to contribute to the identification of future goals, strategies and actions.

The transparency strategy in scientific communication developed by the Department plays a central role not only concerning the dissemination of knowledge but above all for the effective evaluation by the entire scientific community, certainly more effective than the current assessment procedures. The increasingly international dimension of research and education requires the maximum possible transparency and accessibility of research results.

The Department's commitment to supporting scientific journals, the DIDAPress publishing, the Communication Laboratory and the first DIDA Research Week itself aims to meet this need.

Quartiere 1 Comune di Firenze UD - Urban Design Lab CISDU Centro Internazionale Studi Disegno urbano The Urban Design Laboratory activity is focused on research, education and knowledge transfer on topics applicable to UD that, ranging from architecture to urban design, which are investigated and developed at different levels, dimensions and declinations.

It was created in response to the need to face contemporary city problems in an organic-systemic-unitary manner, which takes into account transformations tied to technological innovation processes, environment issues, and social and cultural evolutions that are reshaping future cities and territories. The purpose of the Lab is to elaborate tools and methodologies to formulate design behavioural models able to trigger urban renovation processes and to give a new identity to the cities.

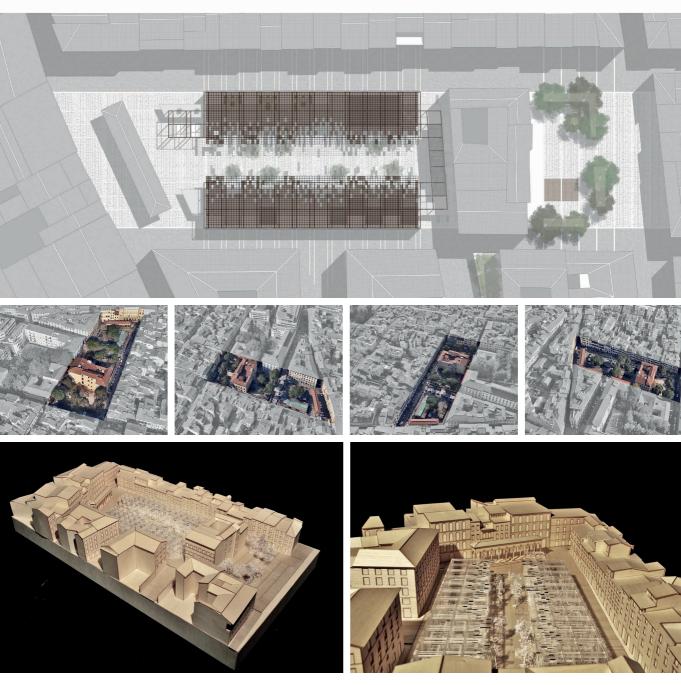

Since Urban Design is characterized by a multi-level and interdisciplinary approach, the Urban Design Laboratory has been composed, since its inception in 2016, by professors and academics from DIDA – University of Florence Architectural Department, belonging to different disciplines, such as Architectural Design, Urban Design, Landscape Design, History and Technology.

In order to promote and develop its activities, beyond its collaboration with DIDALabs, UD has concluded a partnership with CISDU – International Centre for Studies in Urban Design, sharing activities, actions and the same working space inside the DIDA premises. CISDU is a non-profit association, recognized with Statut Consultatif in 2001 by the European Council and established in Florence in 1986 upon initiative of academics from the Faculties of Architecture of the Universities of Florence, Darmstadt, Stuttgart and Nottingham.

With the purpose of deepening, disseminating and promoting Urban Design Culture, Urban Design Laboratory offers a wide range of services to support education, teaching, research, internships, sharing and promotion.

Printed by Rubbettino Print | Soveria Mannelli (CZ) for **dida**press **Dipartimento di Architettura** Università degli Studi di Firenze April 2019

DIDA, the Department of Architecture of the University of Florence, performed an open and public analysis and evaluation of the scientific research carried out during the first five years of activity since its establishment, in order to define its research strategies, their relationship with the 2nd and 3rd cycle education, the role of experimental research and the system of labs at DIDA (DIDALABS), as well as the role of research units and interuniversity research centers.

The aim of the DIDA Research Week Book 2018 is to communicate the results of such research, in all the aspects which were carried out at DIDA during its first five years of activity.
